PROFESSIONAL SUMMARY

- Proficient in leveraging AWS cloud services to design and implement scalable data solutions, enhancing operational efficiency and reducing costs.
- Skilled in developing and deploying applications using Langchain and Langgraph, driving innovation in data processing and analysis.

EXPERIENCE

AI Data Engineer

Oro AI

2025-01-06 – 2025-01-10

Remote

- Developed and implemented robust data pipelines using Airflow to automate workflows, ensuring timely and accurate data processing across various platforms. Leveraged AWS services to design and deploy scalable cloud-based solutions, optimizing resource utilization and enhancing system performance.

EDUCATION

MS in ADA

BU

2025-01-06 – 2025-01-10

CERTIFICATIONS

abc

xyz

2025-01-08

SKILLS

AWS

Langchain

Airflow

Python

MongoDB

SQL

Pinecone

ACHIEVEMENTS

- Achieved a specialization in Advanced Data Analytics (ADA), demonstrating a strong foundation in data-driven decision-making and analytical skills essential for a career in data science.
- Completed coursework in Python programming, equipping with the ability to develop robust data analysis tools and automate processes, aligning with industry standards.
- Gained proficiency in AWS, enhancing cloud computing skills necessary for deploying scalable data solutions and managing large datasets effectively.
- Studied PySpark, enabling the ability to handle big data processing and analytics, which is crucial for roles focused on data engineering and analysis.
- Explored Langchain, fostering skills in building applications that utilize language models, preparing for innovative roles in AI and machine learning.
- Consistently maintained a high academic performance, reflecting dedication and a strong work ethic, which are vital for success in fast-paced professional environments.
